

Project Development Phase

Delivery of Sprint - 1

Date	26 October 2022
Team ID	PNT2022TMID10647
Project Name	Chatbot for College management system

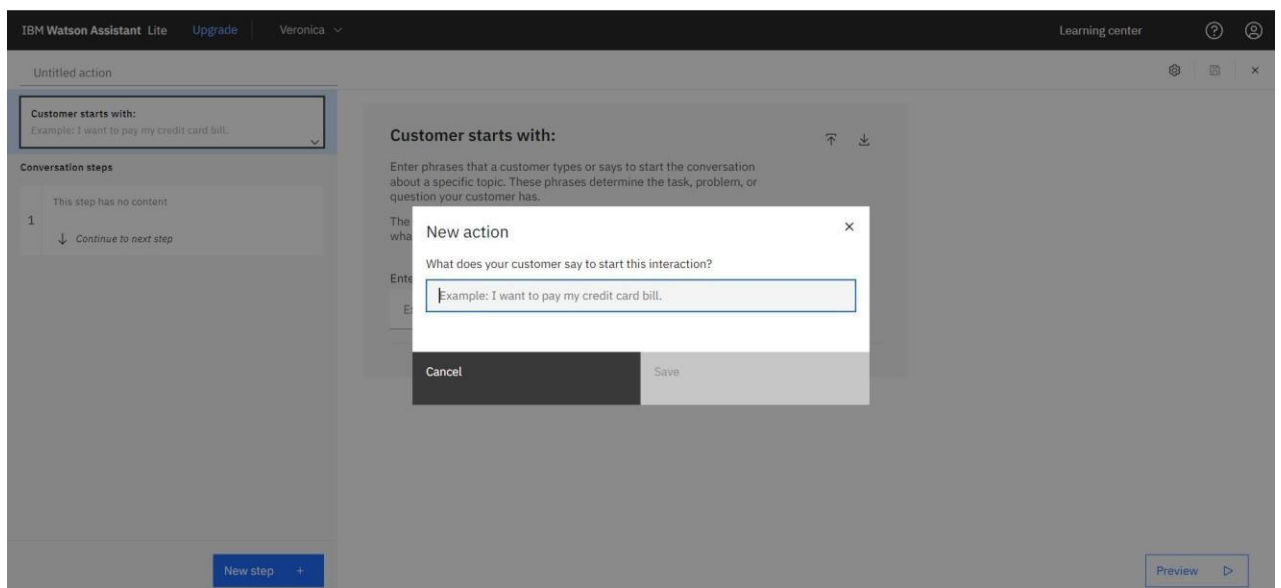

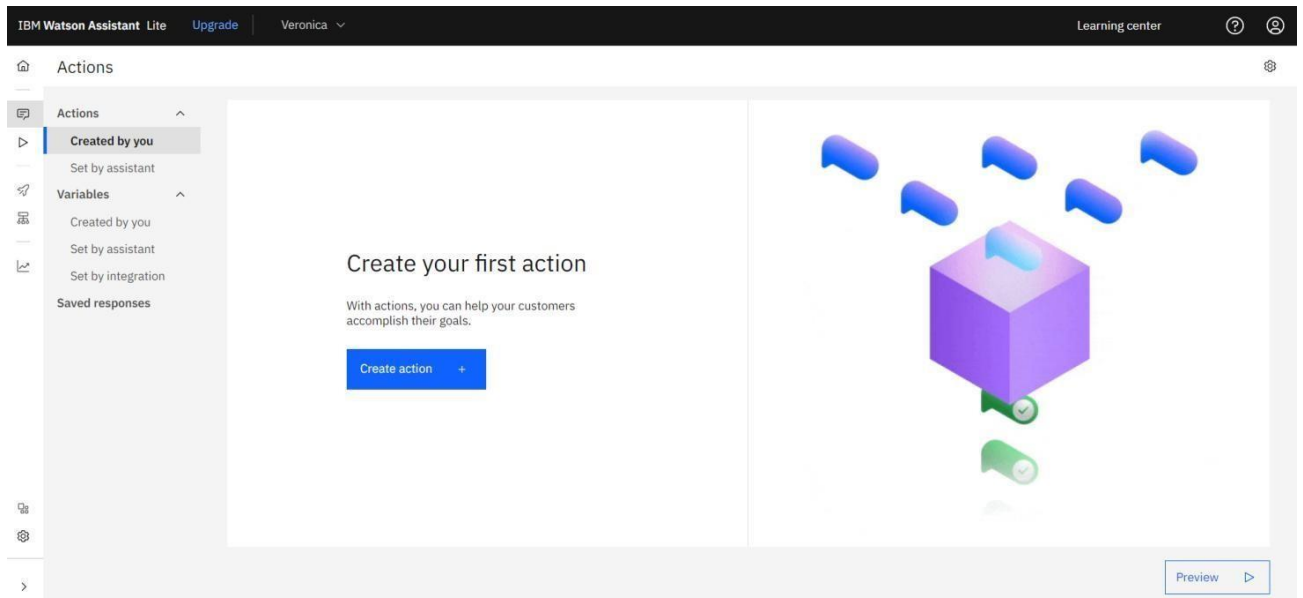

Creating IBM Watson Service

In this activity, we are creating the necessary IBM Watson Service.

Creating Action Skills

Skills are nothing but actions and steps. Steps are the subset of actions where conversations are built and the assistant is integrated with these skills.

Creating Admission Process

The screenshot shows the IBM Watson Assistant interface for creating a new conversation named "Admission". The interface is divided into two main panels. The left panel, titled "Conversation steps", shows a list of steps. Step 1 is selected, with the text "Application can be find in college website you can download there..." and a "Go to action: Home" button. The right panel, titled "Customer starts with:", provides instructions on how to start the conversation and a list of phrases that the customer might use to start this action. The phrases listed are "Admission", "admission process", "admission form", and "procedure for admission". A "Preview" button is visible in the bottom right corner of the right panel.

The screenshot shows the IBM Watson Assistant interface for configuring Step 1 of the "Admission" conversation. The left panel, titled "Conversation steps", shows Step 1 selected. The right panel, titled "Step 1 is taken", shows the configuration for this step. It includes a "without conditions" dropdown, a "Define customer response" button, and an "Assistant says" text area containing the text "Application can be find in college website you can download there...". Below this, there is a "Go to another action" button and a "Goes to action" dropdown set to "Home". A "Preview" button is visible in the bottom right corner of the right panel.
